REMEDIATION INVESTIGATION/FEASIBILITY STUDY (RI/FS) WORK PLANS, 100-KR-1 & 4

The Hanford Federal Facility Agreement and Consent Order (Agreement) requires that the work plans for 100-KR-1 and 100-KR-4 be submitted to the Environmental Protection Agency (EPA) and Washington Department of Ecology (Ecology) by August 1990. 100-KR-1 is a source operable unit and 100-KR-4 is the associated groundwater operable unit. These work plans were developed in accordance with the requirements of CERCLA, as implemented through the Agreement. EPA is the lead regulatory agency.

The work plans are enclosed for review. This early submittal is based on agreements among the Department of Energy, Richland Operations Office (DOE-RL), EPA and Ecology to streamline the review for these work plans so that work may begin at the earliest opportunity. As part of the streamlining process, these work plans will undergo parallel review by DOE, EPA, and Ecology. Comments should be provided on computer disk, in Work Perfect format (4.2 or 5.0), as well as hard copy.

DOE and their contractors will have a 30 day review period; all comments must be received by close of business July 5, 1990. Please assure that comments are focused to the reviewer's areas of responsibilities and expertise, that the comments are clearly legible and are referenced to the applicable work plan text.

The EPA, Ecology and their contractors will have a 60 day review period. All comments must be received by close of business August 3, 1990. Ecology is requested to submit their comments through the EPA as provided in the Agreement.

Please address all comments to Mr. J. D. Goodenough (509 376-7087) for 100-KR-1 or Mr. K. M. Thompson (509 376-6421) for 100-KR-4.

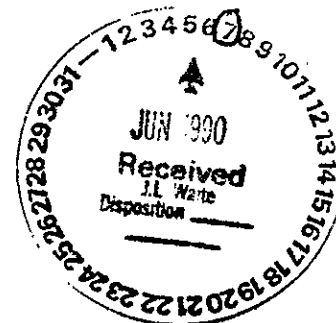

Sincerely,

Steven H. Wisness
Hanford Project Manager
